

RISK TRANSFER

AUTOMATIC RISK TRANSFER PROCESS USING BLOCKCHAIN BACKED SEMI-FUNGIBLE TOKENS

STEP 1

An automatic risk detection service identifies areas of high and low exposure for a re-insurer or insurer.

RISK MAP

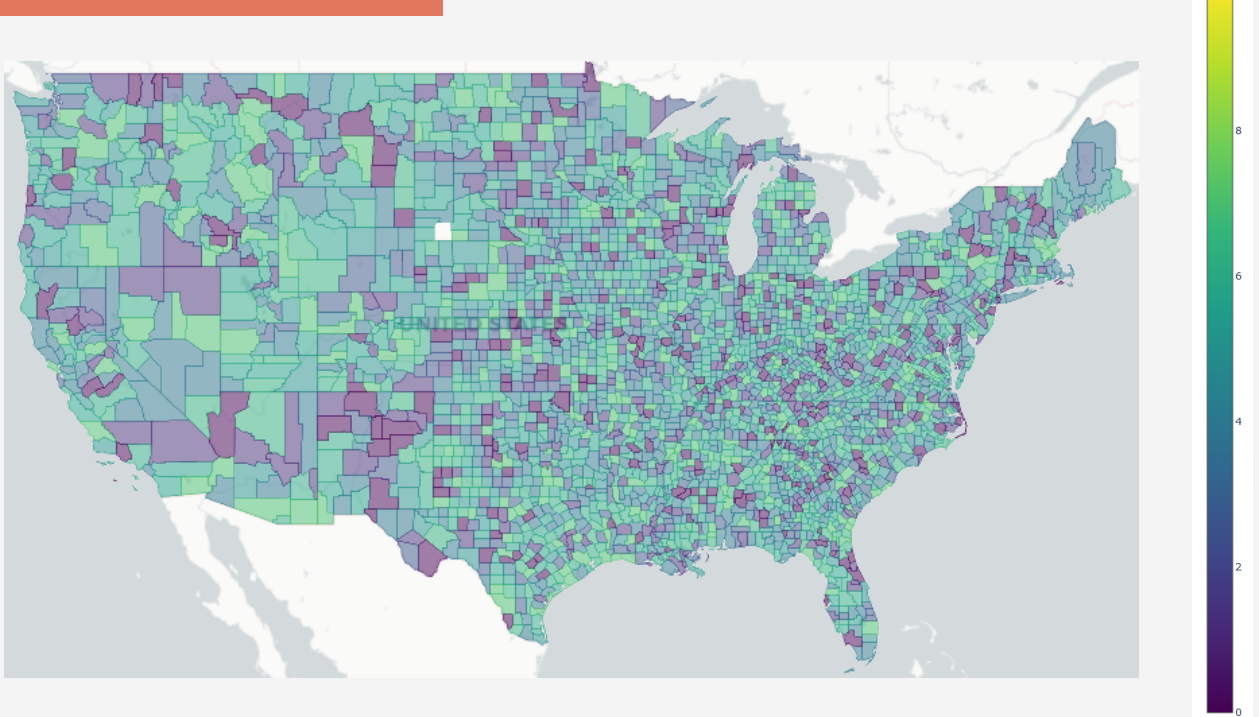

STEP 2

Areas of higher and lower exposure are identified. A manual or automatic risk transfer process can begin.

STEP 3

Portions of liability can be sold in areas of higher exposure, and likewise purchased in areas of lower exposure.
